PROFILE

An Accomplished Full Stack Web Developer with 8+ years of hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Able to play a key role in web development to ensure maximum accessibility, user experience and usability. Possess an excellent knowledge in Algorithms, Object-Oriented Programming (OOP) concepts, Principles and Design Patterns, Web Service architectures, Clean Architecture and all phases of the software development life cycle (SDLC). A quick learner who can absorb new ideas and can communicate clearly and effectively. Keen to learn anything new and applied with the best practice. Strong planner and problem solver, who readily adapts to change, can work independently, and exceeds expectations. Looking for an opportunity in a dynamic organization where my skills will be fully utilized.

09/2018 – 09/2021
Singapore

ATT Systems Group

Software Engineer

Q system providing services to every hospital across the island and also providing other government sectors CPF and HDB too. I've been assigned to NUP (National University Polyclinics). From the project planning to delivering, gathering requirements , system implementation and system integration. Supporting at site after go live.

- Perform full SDLC, from requirements gathering to SIT .
- Worked as a full stack developer and involving in UI designing, API and database design.
- Designed and developed Vue Reporting engine to generate various statistic reports requested by the financial team and the hospitals and clinics.
- Optimized database that significantly reduced the response time of the application.

05/2016 – 02/2018
Myanmar

True Money Myanmar

Software Engineer

FinTech Company is a leading Software for developing enterprise solutions, providing payment gateway across the country, foreign money transfer and collection bill (merchant bill, water bill and electric bill, etc.).

- Designed, planned, and implemented entire project using modern approaches like Clean Architecture and Domain Driven Design.
- Responsible for design, maintenance, developments of projects.
- System integration for new channel enable collection bill
- Support customer in time when query

SKILLS

Bloomberg API integration

Azure WebService deployment

Spring Boot application development

TDD (Test-Driven Development)

Full stack development

Technologies

DBMS

MySQL, PostgreSQL, Oracle SQL Server

Spring MVC, SpringBoot, Kafka, Stuts MVC, RESTful, JWT, NodeJS, ExpressJS, Vue.js, React, Hibernate, JPA , Mybatis, Docker

Cloud Platforms

Azure, Heroku

Web Server

JBoss, Apache Tomcat

Tools

Git, GitHub, BitBucket, Jenkins

Design Skills

Microservice, OOP, Design Patterns, SOLID

Programming

Java, Javascript, TypeScript

EDUCATION

05/2009 – 09/2012
Mandalay, Myanmar

B.C.Sc, Faculty of Computer Science
University of Computer Studies, Mandalay 

05/2014 – 10/2014
Yangon, Myanmar

Certified Professional Diploma in Java Programming
India-Myanmar Center for Enhancement of IT Skills 

- Operating System concept
- Software Development life Cycle
- OOPs with C++ & Data Structures
- Database Technologies
- Foundations of Web Technologies
- Core Java
- Enterprise Java

Professional Diploma in Java Programming with Grade B+
